Study information

Scientific Title

Study objectives

1. Do nutrient supplement oils reduce incidents of poor behaviour?
2. Do they have any effect on the externalising or internalising of emotion?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Double blind, one-way crossover RCT (24 weeks)

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Mental and Behavioural Disorders

Interventions

Not provided at time of registration

Intervention Type

Supplement

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Supplement oils

Primary outcome measure

An assessment of the value of Nutrient Oils in the management of emotions and behaviour at adolescence

Secondary outcome measures

Not provided at time of registration

Overall study start date

16/01/2006

Completion date

16/07/2006

Reason abandoned (if study stopped)

Insufficient Personnel

Eligibility

Key inclusion criteria

30 pupils (in two groups of 15)

Participant type(s)

Patient

Age group

Child

Sex

Not Specified

Target number of participants

30

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

16/01/2006

Date of final enrolment

16/07/2006
