Study information

Scientific Title

Artesunate and Amodiaquine: tolerability and pharmacokinetic study in healthy normal volunteers of non-fixed and fixed combination (Malaysia)

Study objectives

Not provided at time of registration

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Malaria

Interventions

Artesunate tablet 50 mg. Amodiaquine tablet (153 mg base/tablet). Combination of artesunate/amodiaquine (100 mg and 270 mg, respectively). For both arms, a single dose of appropriate drug(s) will be taken orally with 200 ml tap water after an overnight fast.

Intervention Type

Drug

Phase

Not Applicable

Drug/device/biological/vaccine name(s)

Artesunate, amodiaquine

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s))

Not provided at time of registration

Completion date

26/11/2006

Eligibility

Key inclusion criteria

- 1. Male/female age 21 45 years
- 2. Written consent
- 3. Voluntary participation fully aware of possible side effects
- 4. No significant abnormal findings on history or examination, particularly no prior liver disease, cardiovascular disease or peripheral neuropathy
- 5. No clinically significant abnormalities on haematology, liver and renal function tests
- 6. Non pregnant on test (women)
- 7. Normal electrocardiogram (ECG)
- 8. No history of antimalarial ingestion (chloroquine, amodiaquine, quinine, halofantrine, pyrimethamine-sulfadoxine associated or not to mefloquine) in the preceding two months
- 9. No other drugs or medications, including over-the-counter preparations, ingested in the preceding week
- 10. Adequate venous access

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

- 1. Refusal of consent
- 2. Biological or electrocardiographic anomalies
- 3. Presence of hepatic, renal and gastrointestinal disorders
- 4. Smokers (>10/day), abuse of alcohol or recreational drugs
- 5. Presence of malaria parasites on a thick smear
- 6. Subjects having been in a malarial area in the preceding 8 weeks
- 7. Subjects having ingested drugs in the preceding week
- 8. Presence of acute or chronic infections

Date of first enrolment

26/11/2004

Date of final enrolment

26/11/2006

Locations

Countries of recruitment
