# Study information

#### Scientific Title

Evaluating the effect of therapeutic massage in side-to-side weight-bearing symmetry in subjects with lower back pain

#### **Study objectives**

Whether therapeutic massage has a significant improvement in side-to-side weight-bearing symmetry in subjects with lower back pain.

#### Ethics approval required

Old ethics approval format

#### Ethics approval(s)

Not provided at time of registration

#### Study design

Single blind study

#### Primary study design

Interventional

#### Study type(s)

Treatment

#### Health condition(s) or problem(s) studied

Musculoskeletal Diseases: Lower back pain

#### **Interventions**

The trial is randomised by using randomised permutations to assign the research participants to either therapeutic or non-therapeutic group at the end of Stage A. Two types of massage are used: therapeutic versus non-therapeutic.

#### **Intervention Type**

Other

#### Phase

**Not Specified** 

#### Primary outcome(s)

Evaluate whether there is a significant change in side-to-side weight bearing symmetry after massage, by using the t-test

## Key secondary outcome(s))

Not provided at time of registration

#### Completion date

01/09/2004

# **Eligibility**

#### Key inclusion criteria

6 participants aged 20-65 years old

# Participant type(s)

Patient

#### Healthy volunteers allowed

No

#### Age group

Adult

#### Sex

All

#### Key exclusion criteria

Not provided at time of registration

#### Date of first enrolment

01/05/2004

#### Date of final enrolment

01/09/2004

# Locations

#### Countries of recruitment

**United Kingdom** 

England

# Study participating centre
