Study information

Scientific Title

Study objectives

What are the barriers to implementing psychological treatments for schizophrenia and how might these be overcome?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Cluster randomised trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Mental and Behavioural Disorders: Schizophrenia

Interventions

Cluster randomised trial of a training and implementation programme of the NICE guideline across community mental health teams in SLAM

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Numbers of patients eligible, offered and accepting NICE guideline compliant treatment. Measures of resource (capacity in terms of number of professionals with appropriate skills, availability of training and support etc), measures of structural and personal barriers to implementation. Patient awareness, need and demand for the psychological treatments specified in NICE.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/05/2004

Completion date

30/09/2007

Eligibility

Key inclusion criteria

1. All professionals in the clinical teams
2. 50 patients in each of two of these teams

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

100

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/05/2004

Date of final enrolment

30/09/2007
