Study information

Scientific Title

Acronym

DRN132

Study objectives

1. Each young person given the option of 'Transition Sessions' (4 in total)
2. Begins with 'Transition Planner'
3. Addresses issues pertinent to young person and their diabetes
4. Aimed at looking at self care issues
5. Encouraging young people to take control of their health
6. Managing the transition to adult services
7. Supporting young people to make informed decisions about health choices
8. Supporting staff to encourage this to happen

Ethics approval required

Old ethics approval format

Ethics approval(s)

MREC approved (ref: 07/Q0904/19)

Study design

Single centre non-randomised interventional process of care trial

Primary study design

Interventional

Secondary study design

Non randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Diagnostic

Participant information sheet

Health condition(s) or problem(s) studied

Topic: Diabetes Research Network; Subtopic: Both; Disease: Service delivery

Interventions

Transition Pathway: Young people with diabetes aged 15 - 16 years at Northumbria Healthcare NHS Trust

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Barriers and facilitators to implementing a Transition Pathway for adolescents with diabetes

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/01/2008

Completion date

31/08/2010

Eligibility

Key inclusion criteria

1. Young people aged 16 years and older
2. Attend the Diabetes service at North Tyneside General Hospital
3. Transferred from the paediatric service at North Tyneside, having taken part in the 'transition pathway' during their final year in paediatrics

Participant type(s)

Patient

Age group

Adult

Lower age limit

16 Years

Sex

Not Specified

Target number of participants

Planned sample size: 31; UK sample size: 31

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/01/2008

Date of final enrolment

31/08/2010
