Participant information sheet

Health condition(s) or problem(s) studied

Mental and Behavioural Disorders: Psychiatric disorder

Interventions

Following consent procedures obtained in the week prior to discharge from the in-patient ward (Minstead Ward, Western Hospital) baseline measurements, including demographics and ICD-10 diagnoses, of all patients will be documented. In addition, patients will be assessed using the Camberwell Assessment of Need for the Elderly, the Mini Mental State Examination and Geriatric Depression Scale. 140 admissions will then be randomised to receive normal follow up arrangements alone or early follow up with the Locality Link (LLN) nurse in addition to normal follow up arrangements. All patients will be reassessed in the community using the Camberwell Assessment of Need for the Elderly, the Mini Mental State Examination and Geriatric Depression Scale at 6 weeks post discharge. Re-admission rates to the ward will be monitored for all patients in one year post discharge.

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

- 1. To determine whether early post discharge nursing intervention reduces need as assessed by the Camberwell assessment of need for the elderly
- 2. To identify what factors pre and post discharge (demographic, psychiatric morbidity and patient needs) are associated with early readmission
- 3. To identify whether early post discharge nursing intervention reduces early psychiatric readmission rates

Secondary outcome measures

Not provided at time of registration

Overall study start date

26/11/2004

Completion date

25/11/2005

Eligibility

Key inclusion criteria

140 consenting subjects from Minstead Ward, Western Hospital. Inclusion Criteria. All consenting patients with an ICD 10 diagnosis for functional psychiatric illness admitted to the functional psychiatric ward at the Western Hospital (Minstead Ward).

Participant type(s)

Patient

Age group

Senior

Sex

Not Specified

Target number of participants

140

Key exclusion criteria

Patients fulfilling ICD 10 diagnoses for dementia.
