Study information

Scientific Title
Quality circles on rational prescribing (Project H5)

Study objectives
Participation of general practitioners in quality circles on rational prescribing, including feedback of prescribing data, leads to improvement prescribing of performance.

Ethics approval required

Old ethics approval format

Ethics approval(s)

The trial is aimed at implementing evidence-based guidelines into general practice. The intervention is based on peer review groups for GPs, evidence based guidelines and individual feedback of prescription data to the GPs. In Germany, by the Social Code Book (SGB V) both the regional associations of statutory sick fund doctors (KV) and the regional statutory sick funds like the VdAK/AEV Hesse are obliged to inform doctors about prescribing and to support them about the use of prescription budgets. In this trial we tried to optimise implementation of what is already asked by the law and measure the effect against a control group.

In a contract signed on August 3rd, 2001, between the VdAK/AEV Hesse, the KV Hesse (which both are statutory legal institutions) and the research institute it is formulated that the regulations of the law about data protection and protection of patients are to be followed by all partners. A data approval committee of the KV and the VdAK/AEV Hesse gave positive approval of the contract before it was signed.

Study design

Non-randomised, clustered, controlled trial

Primary study design

Interventional

Study type(s)

Quality of life

Health condition(s) or problem(s) studied

N/A

Interventions

Nine meetings of approximately two hours each in a quality circle (eight to 12 members), individual feedback of own prescribing data compared to all practices in the project and compared to all practices in the control group. Background information on prescription drugs, price-comparison lists based on defined daily doses, evidence-based guidelines of the German College of General Practitioners (DEGAM) and the Drug Committee of the German Chamber of Physicians (AKdÄ).

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Mean prescription costs in Euros.

Key secondary outcome(s)

1. Percentage of patients who received a prescription
2. Percentage of generic drugs prescription of all potentially prescriptions
3. Percentage recommended lipid lowering drugs of all lipid lowering drugs prescriptions

4. Percentage of recommended antibiotics of all antibiotic prescriptions
5. Percentage of recommended antidiabetics of all antidiabetic prescriptions

Completion date

31/10/2003

Eligibility

Key inclusion criteria

1. Convenience sample of General Practitioners (GPs)
2. Patients who were insured by the VdAK/AEV (Ersatzkassen) sick fund Hessen and treated by the participating GPs

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Patients who were not insured by the VdAK/AEV (Ersatzkassen) sick fund

Date of first enrolment

01/06/2002

Date of final enrolment

31/10/2003
