# Study information

#### Scientific Title

Adherence therapy for people with schizophrenia in Suanprung Psychiatric Hospital, Thailand: a randomised controlled trial

#### Study objectives

Adherence therapy can reduce symptoms, increase attitude and satisfaction towards medication treatment

#### Ethics approval required

Old ethics approval format

#### Ethics approval(s)

Not provided at time of registration

#### Study design

Randomised controlled trial

#### Primary study design

Interventional

#### Secondary study design

Randomised controlled trial

#### Study setting(s)

Hospital

#### Study type(s)

Treatment

#### Participant information sheet

#### Health condition(s) or problem(s) studied

Schizophrenia

#### **Interventions**

Treatment group: adherence therapy Control group: treatment as usual such as medication treatment, group counselling, occupational and recreational therapy

#### Intervention Type

Other

#### **Phase**

**Not Specified** 

#### Primary outcome measure

Symptoms of schizophrenia measured using the positive and negative syndrome scale

#### Secondary outcome measures

- 1. Symptoms of schizophrenia measured using the Global Assessment of Functioning Scale
- 2. Attitude towards medication measured using the Hogan Drug Attitude Inventory
- 3. Satisfaction with medication measured using the Satisfaction With Antipsychotic Medication Scale
- 4. Side effects of medication measured using the Liverpool University Neuroleptic Side Effect Rating Scale

#### Overall study start date

01/12/2004

#### Completion date

31/08/2005

# **Eligibility**

#### Key inclusion criteria

- 1. Patients diagnosed by a psychiatrist with schizophrenia according to ICD-10 criteria (World Health Organisation ([WHO], 1992)
- 2. People with schizophrenia who are older than 20 years of age because they have reached the age of maturity legally and can provide consent independently
- 3. People with schizophrenia who have been assessed by a psychiatrist not involved in this study to determine that they can provide informed consent
- 4. People with schizophrenia who are residing in Muang Chiang Mai district

#### Participant type(s)

Patient

#### Age group

Adult

#### Sex

Both

# Target number of participants

70

#### Total final enrolment

32

#### Key exclusion criteria

Patients suffering from organic brain diseases or learning disability

#### Date of first enrolment

01/12/2004

#### Date of final enrolment
