# Study information

## Scientific Title

Effectiveness of the tailored evidence based practice (EBP) training program for Filipino physiotherapists: a randomised controlled trial

## Acronym

EBP for FilPTs

## Study objectives

Study hypotheses:

1. The evidence based practice training program (EBP for FilPTs) will result in significant improvement in knowledge, skills, attitudes and behaviour of Filipino physiotherapists
2. The EBP training program (EBP for FilPTs) will be a tested model of continuing education and uptake of evidence which is contextually relevant to Filipino physiotherapists, and which could be adapted readily for physiotherapists from other developing countries, and allied health professionals who are not first contact practitioners in any health care system

## Ethics approval required

Old ethics approval format

## Ethics approval(s)

University of South Australia Human Research Ethics Committee, 25/11/2010, ref: 0000021872

## Study design

Randomised controlled trial

## Primary study design

Interventional

## Secondary study design

Randomised controlled trial

## Study setting(s)

## Study type(s)

Treatment

## Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

## Health condition(s) or problem(s) studied

Evidence-based practice in physiotherapists

## Interventions

The intervention is the tailored Evidence Based Practice (EBP) training program named as the EBP for FilPTs. The intervention is to be tested against a waitlist control group. The intervention is to be conducted as a one-day training, in a seminar workshop format and participants will be monitored on a 3-month period.

**Intervention Type**

Other

**Phase**

Not Applicable

**Primary outcome measure**

1. Knowledge and skills to EBP (measured by the Adapted Fresno Test) - measured at baseline, post one day intervention and after the 3 month monitoring
2. Attitudes to EBP (Questions on attitudes by Stevenson et al 2004) - measured at baseline, post one day intervention and after the 3 month monitoring
3. Behaviour (Activity diaries) - 3 month monitoring

**Secondary outcome measures**

No secondary outcome measures

**Overall study start date**

01/02/2011

**Completion date**

31/10/2011

**Eligibility****Key inclusion criteria**

1. Licensed to practice physiotherapy and trained in the Philippines
2. Have not ever participated in any formal EBP training
3. Aged 20 years and over, either sex

**Participant type(s)**

Patient

**Age group**

Adult

**Sex**

Both

**Target number of participants**

54

**Key exclusion criteria**

Does not meet inclusion criteria

**Date of first enrolment**

01/02/2011

**Date of final enrolment**

31/10/2011
