NCT00003354

Protocol serial number

G9328312

Study information

Scientific Title

A randomised controlled trial of laparoscopic surgery for colorectal cancer

Acronym

CLASICC

Study objectives

To determine whether disease-free and overall survival from laparoscopic surgery for colorectal cancer is comparable to that of conventional surgery as assessed by conventional end-points of survival and surrogate end-points of pathological findings

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Colorectal cancer

Interventions

Laparoscopic surgery vs conventional surgery

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

- 1. Pathological endpoints (circumferential, longitudinal and high-tie mesenteric resection margins)
- 2. 30-day operative mortality
- 3. Disease-free survival, overall survival and local recurrence rates at 3 years
- 4. Local and distal recurrence rates, quality of life and cost effectiveness

Key secondary outcome(s))

- 1. Disease-free and overall survival at 5 years
- 2. Port-site and wound-site recurrence
- 3. Complication rates
- 4. Quality of life and cost effectiveness

- 5. Blood transfusion requirements
- 6. Loco-regional, anastomotic and distant metastases

Completion date

31/12/2009

Eligibility

Key inclusion criteria

- 1. Clinical diagnosis of colorectal cancer (unless this occurs in the transverse colon)
- 2. Suitable for elective surgical resection by right hemicolectomy, left hemicolectomy, sigmoid colectomy, anterior resection or abdomino-perineal resection
- 3. Aged >18 years
- 4. Give written informed consent

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Lower age limit

18 years

Sex

Not Specified

Key exclusion criteria

- 1. Adenocarcinoma of the transverse colon
- 2. Any contraindication to pneumoperitoneum
- 3. Acute intestinal obstruction
- 4. Malignancy within previous 5 years (except basal cell carcinoma, in situ carcinoma of cervix or prostate cancer)
- 5. Synchronous multiple adenocarcinomas
- 6. If female, be pregnant
- 7. Associated gastrointestinal disease that requires surgical intervention

Date of first enrolment

01/07/1996

Date of final enrolment

31/12/2009
