Study information

Scientific Title

Study objectives

To determine the effects of timing of lip repair on parent-infant relationship and infant development

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Plastic surgery

Interventions

Groups are those having neonatal lip repair, and those having 'late' ie 2-3 month repair

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome(s)

Parental mental state, mother-infant interactions, infant social and cognitive development

Key secondary outcome(s)

Not provided at time of registration

Completion date

30/09/2000

Eligibility**Key inclusion criteria**

Singleton infant, 37-42 week gestation, greater than 2.5 kg birthweight, index group have cleft lip (with or without cleft of palate)

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Sex

All

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/10/1997

Date of final enrolment

30/09/2000
