Study information

Scientific Title

Study objectives

Is Speech and Language Therapy Effective with Children who have a primary Speech and Language Disability?

Sub-questions are:

1. Is the timing of such intervention significant?
2. Are there early prognostic indicators as compared with outcome?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Mental and Behavioural Disorders: Speech disorders

Interventions

1. Brief immediate
2. Brief deferred and ongoing intervention

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Statistical analyses of variance and regression will compare effects of intervention and prognostic indicators on outcome. The key outcome measure will be the reduction in the severity of the primary speech/language disability.

Secondary outcome measures

Not provided at time of registration

Overall study start date

02/01/1999

Completion date

08/01/2001

Eligibility**Key inclusion criteria**

Those children who are referred to Speech and Language Therapy (SLT) who have a primary speech/language disability in the absence of an attributable causal condition e.g. hearing loss, developmental disability or physical disability.

Participant type(s)

Patient

Age group

Child

Sex
