Study information

Scientific Title

Study objectives

To ascertain whether aspiration of traumatic elbow effusions reduces pain, increases mobility and quality of life?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Injury, Occupational Diseases, Poisoning: Traumatic elbow effusion

Interventions

Randomly assigned to aspiration or not.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Parameters of pain, mobility and quality of life will be assessed on presentation, after treatment, one day, one week and 3 months.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/10/2007

Eligibility

Key inclusion criteria

150 patients with traumatic elbow effusions, or type 1/2 radial head fractures.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/11/2003

Date of final enrolment

01/10/2007
