Study setting(s)

Hospital

Study type(s)

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Surgery: Knee arthroplasty

Interventions

Minimal invasive approach vs standard medical parapatellar approach

Intervention Type

Procedure/Surgery

Phase

Not Applicable

Primary outcome measure

Decreased costs, hospital stay, and rehabilitation for patients with unicompartmental prostheses compared with total knee replacement.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/05/2002

Completion date

31/05/2004

Eligibility

Key inclusion criteria

All patients on the waiting list for unicompartmental knee replacement under the care of Consultant Orthopaedic Surgeons Mr Apthorp and Mr Butler-Manuel.

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified
