Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied

Mental and behavioural disorders: addiction

Interventions

1. (SN) screened by a specialist nurse, and then offered a minimum of three further appointments with the specialist nurse over a 12-month period, in which participants were given counselling regarding smoking cessation and other appropriate behavioural change, supported by appropriate health education material.
2. (GP) screened and counselled by a specialist nurse on one occasion and then advised to seek further advice from their GP.
3. Control group receiving no intervention within the 12-month study period.

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Smoking status at 12 months follow-up validated by salivary cotinine.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/06/1995

Completion date

30/09/1998

Eligibility

Key inclusion criteria

Friends or relatives of in-patients at Frenchay Hospital who were smokers
