Study information

Scientific Title

Study objectives

To examine the efficacy of adaptive training in auditory temporal processing on specific language impairment.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Language impairment

Interventions

Children were allocated to one of three groups:

Group A: received the 'FastForWord' intervention as a home-based therapy for 6 weeks Group B: received commercially available computer-based activities designed to promote language as a control for computer games exposure Group C: received no additional study intervention

Intervention Type

Other

Phase

Not Applicable

Primary outcome(s)

Standardised measure of receptive and expressive language, assessing performance at baseline and at 9 weeks and 6 months.

Key secondary outcome(s))

No secondary outcome measures

Completion date

01/01/2005

Eligibility

Key inclusion criteria

- 1. Children aged between the ages of 6 and 10 years, either sex
- 2. International Classification of Disease, 10th Revision (ICD-10) research criteria for specific receptive language impairment

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Lower age limit

6 years

Upper age limit

10 years

Sex

All

Key exclusion criteria

Does not meet inclusion criteria

Date of first enrolment

01/01/2004

Date of final enrolment

01/01/2005
