## Study information

Scientific Title

**Study objectives**

To determine the feasibility of delivering two smoking cessation methodologies 5As (Ask, Advise, Assess, Assist, Arrange) and behavioural change counselling, to a cohort of patients who smoke and have been referred to an oral medicine department.

**Ethics approval required**

Old ethics approval format

**Ethics approval(s)**

Ethics approval received from:

1. The Glasgow Area Dental Ethics Committee on the 23/12/2003
2. The West Glasgow Ethics Committee 2 on the 20/09/2005 (protocol amendment)

**Study design**

Randomised, controlled, two armed trial

**Primary study design**

Interventional

**Study type(s)**

Treatment

**Health condition(s) or problem(s) studied**

Potentially malignant oral lesions

**Interventions**

Interventions group received advice based on the 5As (Ask, Advise, Assess, Assist, Arrange) and Nicotine Replacement Therapy (NRT) and behaviour change counselling.

Control group received treatment as usual.

**Intervention Type**

Other

**Phase**

Not Specified

**Primary outcome(s)**

1. Self reported quit rates
2. Validated by Carbon Monoxide (CO) and salivary cotinine

**Key secondary outcome(s)**

Self-reported changes in smoking behaviour, including reduction in cigarettes and increase in number and length of quit attempts.

**Completion date**

03/03/2004

# Eligibility

## Key inclusion criteria

Patients who smoke, and have been referred with suspicious oral lesion.

## Participant type(s)

Patient

## Healthy volunteers allowed

No

## Age group

Not Specified

## Sex

Not Specified

## Key exclusion criteria

Patients who have been diagnosed with oral cancer.

## Date of first enrolment

03/03/2004

## Date of final enrolment

03/03/2004

# Locations

## Countries of recruitment

United Kingdom

Scotland

## Study participating centre

### Level 8
