Study information

Scientific Title

Comparison of topical keturolac versus dexamethasone after vitreo-retinal surgery

Study objectives

The aim of the study is to determine if topical ketorulac has equal anti-inflammatory efficacy to dexamethasone with fewer adverse effects (specifically steroid-induced glaucoma).

Ethics approval required

Old ethics approval format

Study design

Prospective randomised double-blind study

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Surgery: Vitreo-retinal

Interventions

Prospective, randomised, double blind study comparing topical keturolac to dexamethasone as post-operative anti-inflammatory medication following vitreo-retinal surgery.

Intervention Type

Drug

Phase

Not Applicable

Drug/device/biological/vaccine name(s)

Keturolac, dexamethasone

Primary outcome(s)
