## Additional identifiers

### EudraCT/CTIS number

2005-002438-37

### IRAS number

### ClinicalTrials.gov number

NCT00519805

### Secondary identifying numbers

## Study information

### Scientific Title

A randomised phase III clinical trial investigating the effect of FRAGMin® Added to standard Therapy In patients with lung Cancer

### Acronym

FRAGMATIC

### Study objectives

To assess the effect of adding six months of daily dalteparin (Fragmin) to standard treatment for patients with lung cancer.

### Ethics approval required

Old ethics approval format

### Ethics approval(s)

MREC for Wales, 08/08/2006, ref: 06/MRE09/29

### Study design

Randomised controlled trial

### Primary study design

Interventional

### Secondary study design

Randomised controlled trial

### Study setting(s)

Not specified

### Study type(s)

Treatment

### Participant information sheet

Not available in web format, please use contact details to request a participant information sheet

### Health condition(s) or problem(s) studied

Lung cancer

### Interventions

The trial is a multicentre randomised phase III trial. Patients are randomised to one of two groups with a 1:1 randomisation:

1. Control group: to receive anti-cancer treatment according to local practice
2. Intervention group: to receive anti-cancer treatment according to local practice plus once daily sub-cutaneous dalteparin (fragmin) for six months at a thromboprophylactic dose

**Intervention Type**

Drug

**Phase**

Phase III

**Drug/device/biological/vaccine name(s)**

Dalteparin (fragmin)

**Primary outcome measure**

Overall survival

**Secondary outcome measures**

1. Venous thrombotic event (VTE) free survival
2. Serious Adverse Events (SAEs)
3. Metastasis-free survival
4. Toxicity
5. Quality of life
6. Levels of breathlessness
7. Anxiety and depression
8. Cost effectiveness and cost utility

**Overall study start date**

01/01/2006

**Completion date**

31/10/2011

**Eligibility****Key inclusion criteria**

Patients with histopathologically or cytologically confirmed primary lung cancer of any stage or histology.

**Participant type(s)**

Patient

**Age group**

Adult

**Sex**

Both

**Target number of participants**

2200

**Total final enrolment**

2202

**Key exclusion criteria**

1. Patients with other intrathoracic tumours (e.g. carcinoid, mesothelioma, lymphoma, lung metastases from another primary site)
2. Any previous illness or treatment likely to interfere with protocol treatment or comparisons
3. Known cerebral metastases
4. Haemoptysis of CTC Grade two (symptomatic haemoptysis requiring medical intervention) or above
5. Known bleeding diathesis
6. Known pregnancy or lactation
7. Known allergy to heparin
8. Platelet count lower than  $100 \times 10^9/l$
9. Renal impairment with serum creatinine greater than  $150 \mu\text{mol/l}$
10. Patients who have received therapeutic anticoagulation in the last 12 months
11. Patients taking Ketorolac

**Date of first enrolment**

01/01/2006

**Date of final enrolment**

31/10/2011

## Locations

**Countries of recruitment**

England

United Kingdom
