Study information

Scientific Title

A licensed premise intervention to reduce alcohol misuse and violent injury: a study to assess the feasibility of a randomised controlled trial

Acronym

FLIP

Study objectives

To assess the feasibility of randomised controlled trials in tackling alcohol-related harm in licensed premises

Ethics approval required

Old ethics approval format

Ethics approval(s)

Medical and Dental Research Ethics Committee approved on the 10th October 2008 (ref: 08/11)

Study design

Randomised controlled feasibility study

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied

Violence and alcohol misuse

Interventions

Assessing the feasibility of a premises-level intervention designed to reduce alcohol misuse, and outcomes of misuse including disorder and violent injury.

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Collected at baseline and three months later:

- 1. Drinkers' breath alcohol
- 2. Police data describing the volume of violent offenses in premises

Secondary outcome measures

No secondary outcome measures

Overall study start date

01/07/2008

Completion date

01/08/2010

Eligibility

Key inclusion criteria

- 1. Participants have visited or intend to visit a study premises
- 2. Premises are recruited that have at least one violent incident on-premises in the past 12 months

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

32 licensed premises

Key exclusion criteria

Does not meet inclusion criteria

Date of first enrolment

01/07/2008

Date of final enrolment

01/08/2010
