Study type(s)
Treatment

Participant information sheet

Health condition(s) or problem(s) studied
Obstructive Sleep Apnoea

Interventions
After OSA is diagnosed, patients will be randomised, blinded to the attending physician, into the following groups:
1. Structured education group (study group): patients receive specially arranged educational sessions (involving videos on CPAP treatment and live demonstrations)
2. Conventional group (control group): patients will receive conventional 'education', involving physician explanation of CPAP prior to discharge and written material on OSA, CPAP support hotline and clinic follow up

Intervention Type
Other

Phase
Not Specified

Primary outcome measure
Not provided at time of registration

Secondary outcome measures
Not provided at time of registration

Overall study start date
01/01/1997

Completion date
01/01/1999

Eligibility

Key inclusion criteria
Patients newly diagnosed with Obstructive Sleep Apnoea (OSA) and who agreed to the prescription of home nasal CPAP

Participant type(s)
Patient

Age group
Adult

Sex
Both

Target number of participants
Not provided at time of registration

Key exclusion criteria
Does not meet inclusion criteria

Date of first enrolment
01/01/1997

Date of final enrolment
01/01/1999

Locations

Countries of recruitment
Hong Kong
