Participant information sheet

Health condition(s) or problem(s) studied

Obstructive Sleep Apnoea

Interventions

After OSA is diagnosed, patients will be randomised, blinded to the attending physician, into the following groups:

1. Structured education group (study group): patients receive specially arranged educational sessions (involving videos on CPAP treatment and live demonstrations)
2. Conventional group (control group): patients will receive conventional 'education', involving physician explanation of CPAP prior to discharge and written material on OSA, CPAP support hotline and clinic follow up
