Study information

Scientific Title
Effect of blinding and unmasking on the quality of a peer review

Study objectives

Not provided at time of registration

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Not applicable

Interventions

Manuscripts were randomised as to whether the reviewers were unmasked, masked, or unblinded that a study was taking place. Two reviewers for each manuscript were randomised to receive either a blinded or an unblinded version.

Intervention Type

Other

Phase
