Study information

Scientific Title A randomised controlled pilot study in the use of hyperbaric oxygen therapy versus metronidazole in chronic pouchitis

Study objectives

To assess the benefits and effectiveness of hyperbaric oxygenation as a potential new treatment for chronic or refractory pouchitis.

Ethics approval required Old ethics approval format

Ethics approval(s) Not provided at time of registration

Study design Randomised controlled trial

Primary study design Interventional

Secondary study design Randomised controlled trial

Study setting(s) Hospital

Study type(s) Treatment

Participant information sheet

Health condition(s) or problem(s) studied Pouchitis

Interventions

Randomised controlled trial comparing: 1. Hyperbaric oxygen therapy 2. Metronizadole

Intervention Type Mixed

Primary outcome measure Not provided at time of registration

Secondary outcome measures Not provided at time of registration Overall study start date 30/09/2002

Completion date 10/12/2005

Eligibility

Key inclusion criteria Not provided at time of registration

Participant type(s) Patient

Age group Not Specified

Sex Not Specified

Target number of participants Total number required: 30

Key exclusion criteria Not provided at time of registration

Date of first enrolment 30/09/2002

Date of final enrolment 10/12/2005
