Study information

Scientific Title

Study objectives

A randomised controlled trial comparing outcome and resource use in acute stroke patients managed at home by a multidisciplinary stroke team, managed on general wards under the supervision of a stroke team or managed on a stroke unit will be undertaken to provide information of the effectiveness of alternate strategies of stroke management.

The study will provide information on:

1. The relative effectiveness of each model of stroke care.
2. Criteria to identify stroke patients suitable for domiciliary management and those who will require hospitalisation.
3. The relationship between resource use and outcome in alternative models of stroke care.
4. The acceptability of domiciliary acute stroke management to patients, family/carers and general practitioners.

The data collected also will provide prospective validation for criteria for hospital admission for stroke, information on the impact of interdisciplinary collaboration, intensity and timing of therapy input and liaison between health and social services on outcome and resource utilisation for each alternate strategy.

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Cardiovascular diseases: Cerebrovascular disease

Interventions

1. Acute stroke patients managed at home by a multidisciplinary stroke team
2. Managed on general wards under the supervision of a stroke team
3. Managed on a stroke unit

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Death or institutionalisation at 12 months

Secondary outcome measures

Not provided at time of registration.

Overall study start date

01/04/1995

Completion date

31/03/2000

Eligibility**Key inclusion criteria**

Patients recently suffering from stroke

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

457

Key exclusion criteria

Not provided at time of registration.

Date of first enrolment

01/04/1995

Date of final enrolment

31/03/2000
