Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Gerentology, orthopaedics

Interventions

The patients will be randomized into two groups:

- 1. EHRP Group, the study group, where the patient is discharged (within 2-3 weeks post-surgery) when he/she could walk independently with a quadripod
- 2. TRP Group, the control group, where the patient is discharged (within 4-5 weeks post-surgery) when he/she could walk independently with a stick or without any other walking aids
