Study information

Scientific Title

Study objectives

Executive walkrounds would improve the safety climate of providers

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Single-centre

Study setting(s)

Hospital

Study type(s)

Other

Participant information sheet

Health condition(s) or problem(s) studied

Patient safety and medical errors

Interventions

Executive walkrounds versus no executive walkrounds

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Safety climate measured using the Safety Climate Survey

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/10/2003

Completion date

31/03/2004

Eligibility

Key inclusion criteria

All clinical areas in Memorial Hermann Hospital. The unit of randomization was clinical areas. There were 23 units - 12 control, 11 executive walkrounds.

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

All clinical areas in one hospital - 23 units.

Key exclusion criteria

The emergency dept was excluded.

Date of first enrolment

01/10/2003

Date of final enrolment

31/03/2004

Locations

Countries of recruitment
