Study information

Scientific Title

Study objectives

Executive walkrounds would improve the safety climate of providers

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Other

Health condition(s) or problem(s) studied

Patient safety and medical errors

Interventions

Executive walkrounds versus no executive walkrounds

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Safety climate measured using the Safety Climate Survey

Key secondary outcome(s)

Not provided at time of registration

Completion date

31/03/2004

Eligibility**Key inclusion criteria**

All clinical areas in Memorial Hermann Hospital. The unit of randomization was clinical areas. There were 23 units - 12 control, 11 executive walkrounds.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

The emergency dept was excluded.

Date of first enrolment

01/10/2003

Date of final enrolment

31/03/2004

Locations**Countries of recruitment**

United States of America
