Study information

Scientific Title
The effect of a disease-specific supplement on the postprandial plasma glucose response in type 2 diabetic patients at baseline and after 6 and 12 weeks of supplementation

Acronym
DiaDrink trial

Study objectives
Usage of disease-specific sip feed will improve glucose control in diabetic patients.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Study design
Randomized controlled trial

Primary study design
Interventional

Secondary study design
Randomised controlled trial

Study setting(s)
Not specified

Study type(s)
Treatment

Participant information sheet

Health condition(s) or problem(s) studied
Diabetes Mellitus type II (DM type II)

Interventions
Duration intervention: 12 weeks
Intervention group: disease-specific sip feed.
Control group: isocaloric standard sip feed.

Intervention Type
Other

Phase

Not Specified

Primary outcome measure
Postprandial glucose response.

Secondary outcome measures
1. Glycaemic control before and after 6 and 12 weeks of supplementation
2. Fasting plasma lipid profile before and after 6 and 12 weeks of supplementation

Overall study start date
15/12/2005

Completion date
01/09/2006

Eligibility

Key inclusion criteria
1. Diagnosis type 2 diabetes
2. Age >18
3. HbA1c between 6.5% - 8.5%
4. Anti-diabetic therapy: metformin and/or sulfonylureas
5. In need of nutritional support
6. Capable of using oral drink feed supplementation
7. On a stable and controlled anti-diabetic regime for at least one month
8. Signed informed consent

Participant type(s)
Patient

Age group
Adult

Lower age limit
18 Years

Sex
Both

Target number of participants
34

Total final enrolment
40

Key exclusion criteria
1. Pregnant or lactating woman or woman planning to become pregnant
2. Usage of a disease-specific nutritional supplement within past four weeks
5. Concomitant therapy with systemic glucocorticoids, insulin or anti-diabetic medication other than metformin or sulfonylureas

6. Any acute gastrointestinal disease within two weeks prior to study entry
7. Gastrectomy, gastroparesis or other gastric emptying abnormalities
8. Acute severe heart failure, end stage liver failure or renal failure requiring dialysis
9. Patients receiving enteral nutrition
10. Patients with galactosaemia, fructosaemia or patients requiring a fibre-free diet
11. Drug or alcohol abuse
12. Participation in other trials within 4 weeks of study entry

Date of first enrolment
15/12/2005

Date of final enrolment
01/09/2006
