Study information

Scientific Title

Acronym
BACO Trial

Study objectives
In a randomized controlled study comparing psychiatric consultation with care as usual by the company physician, patients will improve in the intervention group in terms of duration of sick leave, general functioning and quality of life.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Approval received from local ethics committee (METiGG [Kamer Zuid]), date of approval: November 16, 2005 (ref: 5127).

Study design
Randomised controlled trial

Primary study design
Interventional

Study type(s)
Not Specified

Health condition(s) or problem(s) studied
Psychiatric, mental disorders/illness, depressive disorders, anxiety disorders

Interventions
Company physicians are randomised over 2 conditions:
1. The intervention group
2. Care-as-usual group
All company physicians in both conditions receive continuing education and follow a training programme targeted at diagnosis and treatment of depressive disorder and anxiety disorder.
In the intervention group patients of company physicians receive psychiatric consultation as well, resulting in an individually tailored diagnosis and treatment advice.
These psychiatric consultations are embedded in the continuing education to company physicians.

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Reduction of symptoms as measured with the PHQ and quality of life as measured with the SF-20.

Key secondary outcome(s))
Number of complaints, general functioning, fatigue, duration of sick leave.

Completion date
01/05/2008

Eligibility

Key inclusion criteria
Employees with absence from work for a period of at least 6 weeks and no plan for resumption of work within 12 weeks, and a positive screen on either the PHQ or the Whiteley Index.

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Not Specified

Sex
Not Specified

Key exclusion criteria
Insufficient command of Dutch language, negative outcome of PHQ screen, dementia, psychotic symptoms or suicide risk, or the expectation of the company physician of a work related conflict.

Date of first enrolment
03/10/2005

Date of final enrolment
01/05/2008
