Study information

Scientific Title

Study objectives

Can nutritional state of CAPD patients be improved by altering diet to achieve recommended energy intake?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Urological and genital diseases: Renal disease

Interventions

1. Dietary intervention from Research Dietician
2. Conventional dietary advice

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

1. Energy intake expressed as calories/kg body weight
2. Serum albumin, Leptin and IGF
3. Anthropometry - weight, skin fold thickness % body fat
4. Subjective Global Assessment Score

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/10/2001

Completion date

20/06/2003

Eligibility

Key inclusion criteria

Patients from the CAPD population treated by the Wessex renal unit.

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

Added December 2008: 59

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/10/2001

Date of final enrolment

20/06/2003
