# Study information

## Scientific Title

Wessex epidural steroids trial (WEST)

## Acronym

WEST

## Study objectives

The proposed study is a pragmatic multi-centre randomised double blind placebo controlled trial examining the safety and efficacy of epidural steroids in the management of sciatica. It will compare a combination of steroid and local anaesthetic epidural injection with a placebo injection. 120 patients are required in each arm. The study will collect data on functional improvement, pain, physical signs, analgesic intake and impact on global function and mood over one year. A formal cost-effectiveness analysis will be performed. All complications will also be collected.

The objectives are to establish the efficacy and cost-effectiveness of epidural steroids as currently used and identify those who will most benefit.

## Ethics approval required

Old ethics approval format

## Ethics approval(s)

Not provided at time of registration.

## Study design

Pragmatic multi-centre randomised double blind placebo controlled trial

## Primary study design

Interventional

## Secondary study design

Randomised controlled trial

## Study setting(s)

Not specified

## Study type(s)

Not Specified

## Participant information sheet

## Health condition(s) or problem(s) studied

Musculoskeletal diseases: Spinal conditions

## Interventions

1. A combination of steroid and local anaesthetic epidural injection
2. Placebo injection

## Intervention Type

Drug

**Phase**

Not Specified

**Drug/device/biological/vaccine name(s)**

steroid and local anaesthetic epidural

**Primary outcome measure**

Functional improvement, pain, physical signs, analgesic intake and impact on global function and mood over one year. A formal cost-effectiveness analysis will also be performed.

**Secondary outcome measures**

Not provided at time of registration.

**Overall study start date**

01/01/1999

**Completion date**

31/03/2002

## Eligibility

**Key inclusion criteria**

240 patients with sciatica

**Participant type(s)**

Patient

**Age group**

Not Specified

**Sex**

Not Specified

**Target number of participants**

240

**Key exclusion criteria**

Not provided at time of registration.

**Date of first enrolment**

01/01/1999

**Date of final enrolment**

31/03/2002

## Locations

**Countries of recruitment**

England
