Study information

Scientific Title

Acronym

ZORN

Study objectives

To compare effectiveness of the three treatments in routine National Health Service (NHS) care.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Tobacco dependence

Interventions

Group and individual specialist counselling over six weeks, plus NRT, bupropion or both

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Bupropion

Primary outcome(s)

Smoking status at four weeks and 12 months

Key secondary outcome(s)

Not provided at time of registration

Completion date

30/06/2007

Eligibility

Key inclusion criteria

All smokers eligible to use Nicotine Replacement Therapy (NRT) and bupropion who present for help to stop smoking

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

Those with contraindications for NRT or bupropion

Date of first enrolment

01/05/2004

Date of final enrolment

30/06/2007
