Study information

Scientific Title
Effect of oral magnesium supplementation on insulin sensitivity and blood pressure in apparently healthy overweight adults: a randomised double-blinded controlled trial

Study objectives
We analysed whether magnesium supplementation affected insulin sensitivity and Blood Pressure (BP) in apparently healthy Korean subjects as well as in individuals with diabetes and hypertension.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Ethics approval received from the Food Institutional Review Board of Pusan National University Hospital on the 3rd January 2006 (ref: 2006-01).

Study design
Randomised double-blinded controlled trial

Primary study design
Interventional

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Overweight, obesity

Interventions
12.3 mmol (300 mg) of elemental magnesium per day in the form of magnesium oxide or placebo. The total duration of treatment and the total duration of follow up are both 12 weeks (i. e., no follow-up).

Intervention Type
Supplement

Phase
Not Specified

Drug/device/biological/vaccine name(s)
Magnesium supplementation

Primary outcome(s)
1. The HOMeostasis model Assessment of Insulin Resistance (HOMA-IR)
2. Quantitative Insulin Sensitivity Check Index (QUICKI)
3. Systolic BP
4. Diastolic BP

Primary outcomes measured at baseline and 12 weeks (at the end of this study).

Key secondary outcome(s))

1. Lipids
2. Serum trace minerals (magnesium, calcium, and phosphorus)

Secondary outcomes measured at baseline and 12 weeks (at the end of this study).

Completion date
08/01/2006

Eligibility

Key inclusion criteria
1. Aged 30 - 60 years
2. Body mass index greater than or equal to 23 kg/m^2
3. Have not taken any supplements or medications, including anti-diabetic drugs, anti-hypertensive drugs, steroids, or hormonal products, during the previous 4 weeks

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Sex
All

Total final enrolment
155

Key exclusion criteria
1. Pregnant women
2. Those suffering from chronic illnesses, including:
2.1. Chronic liver and renal diseases
2.2. Severe bradycardia
2.3. Myasthenia gravis
2.4. Hypermagnesemia

Date of first enrolment
04/01/2006

Date of final enrolment
08/01/2006

Locations
