Study type(s)

Treatment

Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied

Surgery: Foot and ankle

Interventions

Intervention arm: Popliteal block.

Control: routine intra-operative systemic analgesia

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome measure

Pain score on VAS scale

Secondary outcome measures

Not provided at time of registration

Overall study start date

20/02/2007

Completion date

20/08/2007

Eligibility

Key inclusion criteria

1. Patients at Stepping Hill Hospital having general or spinal anaesthetic for surgery on the forefoot in which two or more toes are involved.
2. Hindfoot surgery
3. Ankle surgery

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

39 in each group, total 78

Key exclusion criteria

1. Infection at puncture site
2. Systemic infection
3. Neurological damage to limb to be blocked

Date of first enrolment

20/02/2007

Date of final enrolment

20/08/2007
