Study information

Scientific Title

Study objectives
Does the CobraPLA® perform as well as the Classic Laryngeal Mask Airway™ during anaesthesia?

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Study design
Randomised controlled trial

Primary study design
Interventional

Secondary study design
Randomised controlled trial

Study setting(s)
Hospital

Study type(s)
Treatment

Participant information sheet

Health condition(s) or problem(s) studied
Surgery: Anaesthesia

Interventions
CobraPLA® and Classic Laryngeal Mask Airway™

Intervention Type
Procedure/Surgery

Phase
Not Applicable

Primary outcome measure
Not provided at time of registration

Secondary outcome measures
Not provided at time of registration

Overall study start date
01/05/2004

Completion date
13/08/2004

Reason abandoned (if study stopped)
Terminated due to two cases of pulmonary aspiration during this and a related study which lead to the decision that the risk to the participants of continuing the study outweighed the potential benefits.

Eligibility

Key inclusion criteria
1. Patients undergoing anaesthesia with ventilation of the lungs
2. Patients have been included if they were undergoing elective anaesthesia for surgery

Participant type(s)
Patient

Age group
Not Specified

Sex
Not Specified

Target number of participants
8 patients recruited - aiming for 32

Key exclusion criteria
Not provided at time of registration

Date of first enrolment
01/05/2004

Date of final enrolment
13/08/2004
