## Study information

### Scientific Title

Shoulder impairment and disability: a randomised controlled trial towards evidence-based physiotherapy

**Study objectives**

Study of physiotherapy for shoulder disorders. The proposed study aims to identify effective methods for the treatment of shoulder disorders and to explore some of the underlying assumptions about its causes and outcome after treatment. There is little valid research into the causes and treatment of shoulder disorders which account for around 1.2% of all patients seen in a general practitioner's clinic.

**Ethics approval required**

**Study design**

Randomised controlled trial

**Primary study design**

Interventional

**Study type(s)**

Treatment

**Health condition(s) or problem(s) studied**

Musculoskeletal Diseases: Shoulder disorders

**Interventions**

In order to develop treatment based on evidence of effectiveness, the study will compare three groups receiving physiotherapy and a control group receiving none.

**Intervention Type**

Procedure/Surgery

**Primary outcome(s)**

Not provided at time of registration

**Key secondary outcome(s)**

Not provided at time of registration

**Completion date**

18/04/2005

**Eligibility****Key inclusion criteria**

Not provided at time of registration

**Participant type(s)**

Patient

**Healthy volunteers allowed**

No

**Age group**

Not Specified

**Sex**
