Treatment

Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied

Surgery: Cardiovascular

Interventions

Random allocation to [a] treatment a [b] treatment b (Small chest incision vs full chest incision).

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome measure

Pain, total blood loss, analgesia requirement, lung function.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/05/2003

Completion date

01/12/2008

Eligibility

Key inclusion criteria

All adult cardiac surgical cases under the care of Mr R U Nair requiring sternotomy.

Participant type(s)

Patient

Age group

Adult

Sex

Both
