Study information

Scientific Title

Acronym
UKALL R2

Study objectives

To compare continuing chemotherapy with unrelated donor BMT in relapsed childhood ALL following a common re-induction and consolidation regimen.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Study design
Randomised controlled trial

Primary study design
Interventional

Study type(s)
Not Specified

Health condition(s) or problem(s) studied
Acute Lymphoblastic Leukaemia

Interventions
Continuing chemotherapy/unrelated donor BMT

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Survival, disease free survival

Key secondary outcome(s))
Not provided at time of registration

Completion date
30/09/2008

Eligibility

Key inclusion criteria
They are children under 15 years at original diagnosis and treated on UKALL trials or pilot studies with first relapse less than 4 years from the start of treatment of ALL at any site and no suitable related bone marrow treatment (BMT) donor is available

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Not Specified

Sex
Not Specified

Key exclusion criteria
1. They are multiply relapsed patients
2. They have a prior history of toxicity or organ damage such that completion of the protocol is felt unlikely at the outset
3. They have had an isolated CNS or testicular relapse more than 6 months off treatment.

Date of first enrolment
01/02/1995

Date of final enrolment
30/09/2008

Locations

Countries of recruitment
United Kingdom
