Study information

Scientific Title

Study objectives

Does resting a weight on the eye following administration of a Sub-Tenon's anaesthetic improve ocular paralysis prior to cataract surgery?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Surgery: Cataract

Interventions

Resting a weight on the eye vs standard practice

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s))

Not provided at time of registration

Completion date

01/04/2003

Reason abandoned (if study stopped)

Lack of staff/facilities/resources

Eligibility**Key inclusion criteria**

RUH patients undergoing cataract extractions under local anaesthetic.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

21/01/2003

Date of final enrolment

01/04/2003

Locations**Countries of recruitment**

United Kingdom

England
