Participant information sheet

Health condition(s) or problem(s) studied

Tension-type headache

Interventions

Acupuncture versus minimal acupuncture versus waiting list

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Added 19/08/09:

Difference in numbers of days with headache between the four weeks before randomisation and weeks 9-12 after randomisation, as recorded by participants in headache diaries.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/03/2002

Completion date

31/08/2004

Eligibility

Key inclusion criteria

296 patients with episodic or chronic tension-type-headache (according to the criteria of the International Headache Society)

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

296

Key exclusion criteria

Does not match inclusion criteria

Date of first enrolment

01/03/2002

Date of final enrolment

31/08/2004
