NCT00031863

Protocol serial number
VICTOR

Study information

Scientific Title

Acronym
VICTOR - Vioxx In Colorectal cancer Therapy: definition of Optimal Regime

Study objectives
Added as of 24 January 2008:
1. Treatment with VIOXX® will result in improved overall survival compared with placebo
2. Treatment with VIOXX® will result in improved disease-free survival compared with placebo

Countries of recruitment amended as of 26 July 2007: Countries of recruitment provided at time of registration: International

Ethics approval required
Old ethics approval format

Ethics approval(s)
Added as of 26 July 2007: Approved by Clinical Trials Committee of the Cancer Research Campaign, the West Midlands Multicenter Research Ethics Committee, and local research ethics committees at participating centers.

Study design
Randomised controlled trial

Primary study design
Interventional

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Colorectal cancer

Interventions
1. VIOXX: 25 mg once daily
2. Placebo: identical in appearance, once daily

As of 26 July 2007: Please note that this trial was terminated prematurely in September 2004 due to worldwide withdrawal of rofecoxib.

Intervention Type
Drug

Phase
Phase III

Drug/device/biological/vaccine name(s)
Vioxx (rofecoxib)

Primary outcome(s)
Added as of 24 January 2008:
Overall Survival

Key secondary outcome(s))
Added as of 24 January 2008:
1. Relapse-free survival
2. Thrombotic cardiovascular safety

Completion date
30/09/2004

Reason abandoned (if study stopped)
Vioxx withdrawn

Eligibility

Key inclusion criteria
1. Histologically proven Dukes Stage C (Stage III any T, N1-2, M0) or B (Stage II, T3 or 4, N0, M0) colorectal carcinoma
2. Complete resection of primary tumour without gross microscopic evidence of residual disease
3. World Health Organisation zero to one
4. Acceptable haematological and biochemical function
5. Within 12 weeks of finishing potentially curative therapy (Surgery +/- radiotherapy +/- chemotherapy)
6. Written informed consent

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Sex
All

Key exclusion criteria
Exclusion criteria added as of 26 July 2007:
1. Active peptic ulceration or gastrointestinal bleeding in the past year
2. History of adverse reactions to NSAIDs
3. Known sensitivity to rofecoxib
4. Those receiving long-term NSAID therapy (except for low-dose aspirin, =100 mg per day)
5. Younger than 18 years
6. Women who were pregnant, lactating, or premenopausal but not using contraception. 7.

History of cancer (other than adequately treated in situ carcinoma of the cervix or basal or squamous-cell carcinoma), inflammatory bowel disease, or severe congestive heart failure

Date of first enrolment
30/04/2002

Date of final enrolment
30/09/2004
