Study information

Scientific Title

Randomised study of pre-operative radio-chemotherapy versus surgery alone in thoracic oesophageal cancer deemed to be resectable

Study objectives

Attempt to prove that preoperative radio-chemotherapy will improve disease-free survival for this patient group.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Cancer: Thoracic oesophageal

Interventions

Arm A: radio-chemotherapy followed by surgery

Arm B: surgery alone

Intervention Type

Mixed

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/03/2004

Eligibility

Key inclusion criteria

Patients with thoracic oesophageal cancer deemed to be resectable

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/06/2002

Date of final enrolment

01/03/2004
