Study information

Scientific Title
Suspected scaphoid fracture management Plaster of Paris versus Splint

Study objectives
Is the Futura Splint an effective way of treating suspected scaphoid fracture?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Injury, Occupational Diseases, Poisoning: Scaphoid fracture

Interventions

Patients are randomised to receive: plaster of paris or splint

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Pain, cost and patient comfort

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/04/2004

Eligibility**Key inclusion criteria**

Patients with suspected scaphoid fracture aged 16-70 years.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

Does not match inclusion criteria

Date of first enrolment

01/08/2002

Date of final enrolment

01/04/2004

Locations**Countries of recruitment**

United Kingdom

England
