Study information

Scientific Title

Comparing the Tolerability and Efficacy of Ostenil Mini in small joint osteoarthritis (OA) in the Carpus compared to a corticosteroid.

Study objectives
To compare the tolerability and efficacy of Ostenil Mini in small joint osteoarthritis (OA) in the Carpus compared to a corticosteroid.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Primary study design
Interventional

Study design
Randomised controlled trial

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Small joint osteorathritis

Interventions
Randomised trial using two groups and questionnaires. Ostenil Mini in small joint OA in the Carpus compared to a corticosteroid

Intervention Type
Drug

Phase
Not Specified

Drug/device/biological/vaccine name(s)
1. Ostenil Mini 2. Corticosteroid

Primary outcome(s)
Not provided at time of registration

Key secondary outcome(s)
Not provided at time of registration

Completion date
01/12/2003

Eligibility

Key inclusion criteria

40 patients with OA of the carpus (20 in each group) will be recruited from patients seeking treatment from the rheumatology and upper limb orthopaedic departments.

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Sex
All

Key exclusion criteria
Does not meet inclusion criteria

Date of first enrolment
01/03/2003

Date of final enrolment
01/12/2003

Locations

Countries of recruitment
United Kingdom

England

Study participating centre
