Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Diagnostic

Health condition(s) or problem(s) studied

Peptic ulcer disease

Interventions

Educational outreach versus no education.

Intervention Type

Other

Phase

Not Applicable

Primary outcome(s)

The following outcomes will be measured retrospectively for the 6 months preceding and following the intervention in all practices:

1. GP prescriptions for antacids and ulcer healing drugs
2. Proportion of appropriate referrals for open access endoscopy (OAE)
3. Proportion of clinically significant findings at OAE

Key secondary outcome(s)

No secondary outcome measures

Completion date

01/07/1999

Eligibility**Key inclusion criteria**

GP practices within Salford and Trafford Health Authority

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

Does not meet with inclusion criteria

Date of first enrolment

01/01/1998

Date of final enrolment

01/07/1999

Locations

Countries of recruitment
