Study information

Scientific Title

Acronym
G-RAF

Study objectives
General practitioners (GP's) will select a greater proportion of patients with significant bowel disease in the intervention arms of this study.

Ethics approval required
Old ethics approval format

Ethics approval(s)
North Sheffield LREC (ref number: NS2002 9 1443), approval received on 01/01/2004

Primary study design
Interventional

Study design
Cluster randomised factorial trial

Study type(s)
Screening

Health condition(s) or problem(s) studied
Colorectal disease

Interventions
This is a factorial study with four arms:
1. Interactive referral proforma: GP's could use an interactive referral document to make referrals to colorectal surgeons
2. Education outreach visit: an educational outreach visit from a surgeon
3. Both of the above
4. Neither of the above (control)

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
The primary outcome will be the proportion of patients with significant bowel disease who are referred.

Key secondary outcome(s)
Secondary outcomes will include the quality of GP referrals

Completion date
01/10/2004

Eligibility

Key inclusion criteria
General practitioners

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Sex
All

Key exclusion criteria
N/A

Date of first enrolment
01/04/2004

Date of final enrolment
01/10/2004

Locations

Countries of recruitment
United Kingdom

Australia
