Study information

Scientific Title

A prospective, randomised controlled study comparing endoscopic nasal polypectomy and endoscopic intranasal ethmoidectomy for patients with nasal polyps

Study objectives

A comparison of two methods of surgical treatment for nasal polyps

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Surgery: Nasal polyps

Interventions

1. Endoscopic nasal polypectomy
2. Endoscopic intranasal ethmoidectomy

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome(s)

Symptom scores, nasal peak flow measures, complication rates, recurrence rates.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/06/2013

Eligibility**Key inclusion criteria**

Patients requiring surgery for nasal polyps.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria
