Study information

Scientific Title

Effects of sensory integration therapy on daily living skills and treatment adherence in children with autism spectrum disorder: a randomized controlled mixed-methods study

Study objectives

Ethics approval required

Ethics approval required

Ethics approval(s)

Approved 27/01/2026, Cyprus University of Health and Social Sciences Scientific Research Ethics Committee (Cyprus University of Health and Social Sciences, Güzelyurt, 392200, Cyprus; +90 (0) 392 444 57 88; info@kstu.edu.tr), ref: KSTU//2026/138

Primary study design

Interventional

Allocation

Randomized controlled trial

Masking

Open (masking not used)

Control

Purpose

Treatment

Study type(s)

Health condition(s) or problem(s) studied

Autism spectrum disorder (ASD)

Interventions

Intervention (Experimental Group):

Sensory Integration Therapy (SIT) program will be applied. The intervention period is 8 weeks, with 45-minute sessions twice a week. The aim of the therapy is to improve children's daily living skills and increase compliance with the treatment.

Control (Control Group):

The control group will receive routine education and support services; no additional sensory integration intervention will be applied.

Intervention Type

Behavioural

Primary outcome(s)

1. Daily living skills measured using the Pediatric Evaluation of Disability Inventory (PEDI), pre-test and post-test scores at pre-intervention (baseline) and post-intervention (after 8 weeks)
2. Sensory processing profile measured using Sensory Profile 2 (Duyu Profili-2) at pre-intervention (baseline) and post-intervention (after 8 weeks)

Key secondary outcome(s)**Completion date**

07/04/2026

Eligibility**Key inclusion criteria**

1. Children aged 4–10 years
2. Diagnosis of Autism Spectrum Disorder (DSM-5) confirmed by a child psychiatrist or documented ongoing diagnostic process
3. Planned continuation at the current educational institution throughout the study period
4. Written informed consent obtained from a parent or legal guardian, and age-appropriate assent from the child

Healthy volunteers allowed

No

Age group

Child

Lower age limit

4 Years

Upper age limit

10 Years

Sex

All

Total final enrolment

Key exclusion criteria

1. Being in the process of receiving sensory integration therapy or having participated in a systematic SIT program in the past
2. Lack of consent from a parent or legal guardian.

Date of first enrolment

10/02/2026

Date of final enrolment

10/02/2026
