Study information

Scientific Title

Acronym

Not Applicable

Study objectives

Does catheter ablation of the tricuspid valve inferior vena cava (TA-IVC) isthmus help to reduce AF

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Atrial fibrillation

Interventions

Direct current cardioversion and isthmus catheter ablation

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/09/2006

Eligibility**Key inclusion criteria**

Any patient with atrial fibrillation suitable for direct current cardioversion and catheter ablation

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/02/2003

Date of final enrolment

01/09/2006

Locations**Countries of recruitment**

United Kingdom

England

Study participating centre

Cardiology Department

London
